PROFILE

Backend-focused software engineer building business systems, web products and mobile applications. Owns architecture, implementation, testing and deployment, with hands-on work across Django/PostgreSQL ERP systems, API-driven commerce and published React Native apps.

CORE SKILLS

Backend: Python, Django/DRF, FastAPI, Node.js/Express, PHP/Laravel, REST APIs, PostgreSQL, MySQL.

Web & mobile: React, Next.js, TypeScript, Vue.js, Flutter/Dart, React Native, Tailwind CSS.

Delivery: Docker, Linux VPS, Nginx, Git, CI/CD, automated testing, backup/recovery, Kubernetes/K3s.

EXPERIENCE

May 2024 – Present

Head of IT & Software Engineer

Cresol Chemicals & Applied Products Ltd · Kano, Nigeria

- Designed and built the Django/PostgreSQL ERP connecting inventory, production, customer ledgers, invoicing, finance, HR and reporting.
- Developed REST APIs for Flutter field-sales applications and a shared backend for Cresol Store's website, mobile app and staff dashboard.
- Built operational tools including product label printing, encrypted backup workflows and an integrated business AI assistant.
- Maintain deployments, investigate production issues and translate day-to-day business requirements into working software.

June 2023 – August 2023

Software Developer

ND Western Limited · Nigeria

- Built tools to validate expenses against business rules and flag inconsistencies in financial records.
- Automated the processing of large Excel datasets for financial reconciliation and reporting.

February 2022 – March 2023

Full-Stack Developer

ND Western Limited · Remote

- Developed a financial management platform with Laravel backend services and a Vue.js frontend.
- Configured GitLab CI/CD workflows and supported Docker deployments on Linux and AWS-hosted applications.

SELECTED PROJECTS

Cresol ERP: Manufacturing and business operations system covering inventory, sales, finance, production, quality control, HR and reporting. Django, PostgreSQL, Celery, Redis.

KekeDrop: Passenger and driver React Native/TypeScript apps published on Google Play, supported by a Node.js API, payments and administration tools.

Cresol Store: Next.js storefront, Flutter app and staff dashboard on a shared Django API. Quotes, orders, delivery and Paystack payments. Private staging.

TrackMeNG / Waffles Runner: Backend, frontend and collaborative design contributions across location-based services and interactive web/mobile experiences.

EDUCATION

B.Eng., Computer Engineering · Enugu State University of Science & Technology · 2019–2024
